Radiation and Radiological Protection in Hong Kong

Organized by:

Supported by:

A professional short course is organized to provide participants in-depth learning and hands-on experience in specialist topics in nuclear engineering, enabling an appreciation of the diverse nature in a field that is being increasingly recognized to have a role in our daily life and sustainable development. The course is targeted at both young and veteran engineers who wish to broaden their horizon or discover the mystery of nuclear engineering. Discussion and exercise will be facilitated by subject-matter experts during the course.

Course Content

1. Radiation and radiological protection
2. Planned and unplanned radiological release from nuclear power plant
3. Environmental radiation monitoring in Hong Kong
4. Accident consequence assessment and contingency plan
